Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-42, drawn to a system for printing a value by means of a graphical user interface for installing software for the printing of value bearing item using a server subsystem for communication over the Internet. The claims are also drawn to a postage printing system that includes a graphical user interface for downloading software for postage printing. Classified in class 705, subclass 60.
- II. Claims 43-68, drawn to method for displaying a graphical user item for registering a user while establishing communication with the server in addition to entering user information into the server. Classified in class 345, subclass 133 and 156.

2. The inventions are distinct, each from the other because on the following reasons:

Inventions I and II are related as subcombinations disclosed as usable in a single Combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has a separate utility such as a system is used for printing a value-bearing item connected to a client subsystem for interfacing with graphical user interface software, used to register user in the system. Invention II has separate utility such as a method for printing a value bearing item over the internet. See MPEP 806.05(d).

Because these invention are distinct for the reasons given above and have acquired a separate status in the art shown by their different classification, restriction for examination purposes as indicated is proper.
